Allowable Subject Matter

1. Claims 3, 6, 7-21 and 23-57 are allowed over prior art.
2. The following is an examiner's statement of reasons for allowance:
3. The combined cited prior art of **Bella et al**, who teaches Internet telephony wherein the architecture includes a caller and callee requesting service via messages, where gatekeeper, routers and Internet backbone are coupled together, and **Williams** who teaches an enhanced Internet wherein request messages for service are communicated via e-mail and over the Internet and **Strauss** who discloses Internet Telephony with enhanced features, and **Golden et al** who teaches intermediate switches/routers communicating with caller and callee requesting resources, wherein request messages are routed to a router via the Internet, and switches/routers consist of ports with timeout functionality.

The prior art fail to teach with respect to claim 9, 10, 16 and 17, to prevent the port at the intermediate point from timing out by repeatedly sending subsequent messages over the Internet to the intermediate point, and with respect to claim 24 and 25, an Internet telephony system signaling destination prevents the port from meeting the time out condition during a user telephony communication by repeatedly requesting signaling message replies from the message source via the intermediate point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
